

## **Alert 6 Panel**

(for Platinum 3, Platinum 3B, & Sentry)

### **Specifications**

Input Power 13.8 volts @ .150 amp

Dimensions 5"W x 5"H x 2"D

w/Plastic Backbox

Finish Painted Aluminum Faceplate

Backbox ABS Plastic

Operating

Temperature 35 to 125 Degrees F

Indicators 6 Red LED Lights &

Audible Alarm (92 DBs)

Connections Pluggable & Unpluggable

Blocks w/Screw Terminals

♦♦ Comes with a Power Supply ♦♦

#### **Features**

- Installs on a wall at a nurse station or security station
- Allows staff to hear and see which door is in alarm condition from a convenient working location
- Gives both an audible and visual confirmation of an alarm condition on any door protected with our Platinum 3, Sentry, or Staff Door Controller
- Audible and visual alarm notification meets Life Safety Code Requirements
- Can report up to six doors based upon facility need. For reporting 7-12 doors to one station, use two Alert 6 panels.
- Pagers can be connected for additional alarm event notification
- Faceplate is manufactured from sturdy metal for durability
- Off-white with maroon trim color presents an attractive design
- Made in the USA

# **Alert 6 Panel Overview**

An Alert 6 panel installed at one or more common work stations will provide both an audible and visual indicator of an alarm condition on any door, hallway, or other area protected with a Wander Control Systems Platinum 3, Platinum 3B, or Sentry Controller.

Adding an Alert 6 panel to your wander system is highly recommended when main work stations are located in areas where employees may have difficulty hearing the alarm from a specific door or hallway being monitored.

Alert 6 has six individually numbered LED lights which are designated to report an alarm condition on up to six doors (based upon facility need). For monitoring 7 – 12 doors at one central location, two Alert 6 panels are used.

A hard wire connecting each Platinum 3, Platinum 3B, or Sentry to the Alert 6 panel is recommended. However, a wireless transmitter can be used to send a signal from each controller to the Alert 6 if desired.

A paging system can also be connected to an Alert 6 panel for additional alarm event notification.

Alert 6 has its own power supply which is independent of other components involved in your wander control system.

Wander Control Systems equipment runs on low voltage – 12 Volts DC. Complete information may be found at www.wandercontrol.com.
