

KP-1, KP-2, & EscortR

Features

- ◆ The KP-1, KP-2, & EscortR are Remote Access Panels for use on the opposing side of a door monitored with a Platinum 3 Series or Sentry Door Controller
- ◆ KP-1 is a mechanical keypad designed for indoor use
- ◆ KP-2 is a mechanical keypad designed for outdoor use – includes a weather resistant cover
- ◆ Enter a facility selected escort code to temporarily disable the security and alarm functions of a door controller for ingress and egress
- ◆ KP-1 and KP-2 escort codes can be changed by facility engineering and maintenance personnel when necessary
- ◆ EscortR is a heavy duty mechanical push button switch which allows remote access with a lower level of security than a keypad and escort code
- ◆ Easy to use
- ◆ Made in the USA
